Lancaster Farming

VOL 15 NO. 40 Lancaster Farming, Saturday, August 29, 1970 $2 00 Per Year

18 FFA Dairy Show Blue Ribbons

Lancaster County FFA members won 18 blue ribbons and the first place Holstein group at the Southeastern Regional FFA Dairy Show at Harrisburg Friday.

All the blue ribbon winners highest.

He had the first place three and four-year old Holstein The animal then went on to become reserve senior champion and reserve grand champion Holstein

Carl Kreider, Solanco FFA, took first place in the senior yearling Holstein class The animal was also junior champion

Other blue ribbon winners by FFA Chapter in the Holstein division were Holstein junior calf — Ronald Gruber, Elizabethtown, first, Linford Weaver, Cloister, fifth, Thomas Bollinger, Cloister, second and Russell Kline, Cloister, third

Senior calf class, Ronald Martin, Manheim Central, second, Junior yearling class, Earl Stauffer, Cloister, second, and Linford Weaver, Cloister, third

Senior yearling, Kreider first, and Nelson Weaver, Cloister, third, two year old, Tom Bollinger, Cloister, second, three and four year old, Stauffer, first

The winning Lancaster County Holstein group consisted of Earl Stauffer, Tom Bollinger, Ronald Martin and Carl Kreider

In the Ayrshire competition, Lancaster County had the following blue ribbons Senior calf class, Robert Campbell, Grasslard, first and Ken Fox Grassland, second senior yearling, Earl Gerhart, Cloister second

In the Guernsey competition Lancaster County took the following blue-ribbons senior calf class, David Bitler, Solanco first senior yearling class, Ken Gruber, Warwick, second, two year old class Jesse Balmer, Warwick, first, three and four year old class Jesse Balmer, second

Both the Lancaster County Ayrshire and Guernsey groups placed second

There were no entries from Lancaster County in the Milking Shorthorn, Jersey or Brown Swiss competition

Corn Leaf Blight Hits! Impact Highly Uncertain

The Southern Leaf Blight has hit Lancaster County

That was the official word Friday from Donald Petersen, Penn State plant pathologist

Max Smith, Lancaster County agricultural agent, said Petersen confirmed the blight on three samples sent from Elizabethtown, Millersville and Gap

In addition, Smith said he has heard of one grower in the Lampeter area who has identified the blight on his own corn.

Before the blight report, the general consensus in the farm community had been that Lancaster County is headed for top-notch corn yields from a record corn acreage.

But impact of the blight is highly uncertain Smith pointed out Friday that the blight fungus appears only to attack certain hybrid varieties Those varieties not susceptible to the disease apparently will not be hurt by the blight, he indicated

Of the four instances of blight found so far in the county, only two varieties are involved

Possible impact of the blight is unknown at this point Missing links include a breakdown of the varieties which are susceptible or an indication of how much of each variety is planted in the area

Even where the blight strikes the amount of damage it will cause is unknown at this point "It's new in Pennsylvania," Smith noted Friday. "Even the people at Penn State have never had any experience with it."

Smith did indicate that "damage begins when it hits" and the corn can soon "look like a blow torch has hit it"

But most corn in Lancaster County already has reached the "milk to early dent stage" and it's questionable just how much damage the blight can cause at this late stage in the corn's development, Smith explained

He indicated that if the corn is being used for silage, the farmer can probably escape most of the damage Penn State pathologists informed him that the blighted corn is safe for silage, Smith said.

But Smith is concerned that if the blight hits the milk to early dent stage corn which is left in the field to mature, there may be considerable damage The corn may not fill out properly, he said.

But, as of Friday, the local blight situation and its meaning for the farmer was highly uncertain Just how much of the area's corn is susceptible to the blight or what damage will occur where the blight strikes were all unknowns

Previous reports have indicated that even where the blight strikes, the overall loss may not be as great as had been originally indicated The latest estimates of national crop loss from the blight have been around five per cent

But the figure is much higher for some areas and for some farms

Some local officials previously had indicated the overall crop loss from the blight, should not be serious if it strikes this late in the season

But if the fungus gets established this year, there's concern about next year, when the blight will have a chance for an early start

A scramble for resistant seed and knowledge about the blight are indicated.

State Board Increases Chester Co. Milk Price

The Pennsylvania Milk Marketing Board has increased fluid milk Class 1 producer prices in the Philadelphia and Suburban Philadelphia (including most of Chester County) areas

At the same time, the board changed the market area's name to the Southeastern Milk Marketing Area No 1, composed of zones 1 and 2 The changes are effective September 1

The Class 1 price will be increased by 13 cents per hundredweight to $7 50 in Zone 1 and eight cents to $7 45 in Zone 2.

Burkhart Wins State Plowing Contest, Chance at U. S. Title

A Lancaster County farmer has won a first place in the State Plowing contest for the first time since 1952 when the contest began

He is Frank R Burkhart, 35, 1030 Silver Spring Road, Lancaster He won the large plow division at the state contest at Hershey Wednesday

By finishing first, Burkhart won the right to represent Pennsylvania in the national plowing contest September 12 in Greenville, Ohio He is eligible for funds from the state for the trip

Burkhart beat 14 other plowmen in his division, many of them veterans of the contest

Burkhart edged out his nearest competitor by a mere two points, 503 to 501 To win, he had to score high in opening furrows, plowing his main furrows, plowing his finishing furrow and preparing the tilled surface

One of his secrets for winning is simply taking the time to do a good job "It's no place for hurrying," he said Of the 14 in the large plow division, Burkhart was one of the last two or three to finish

Married with five children, Burkhart says, "I've had several chances to leave the farm, but I just can't do it It's a great place to raise a family"

He has been actively farming with his father J H Burkhart since 1957 They operate three farms totaling 237 acres He farms 55 acres of potatoes, some grains and hay "We're potato farmers by nature," he said

Frank Burkhart
Plowing Winner

Burkhart earned the chance at the state title on July 28 at New Holland by beating several other county drivers A year earlier he was third in contour plowing

Altogether, 38 plowmen entered the competition at the Hershey Estates farms north of Hershey All were previously county winners

James Mowry of Berlin RD1 was first in small plow competition and also will have a chance at a national title

Charles A Hess of Dallastown was first in contour plowing, but there will be no contour contest at Greenville

How Protein Foods Can Boost Health

Herbert Jordan, Penn State extension poultry specialist, made the following comments this week on why some doctors prescribe eggs

The egg is the only naturally packaged food designed to start feeding life from its beginning as a cell All other foods are designed to sustain life after it is born or hatched into our environment

The egg is the only complete food package a young bird has for the first several weeks of its life The egg offers man this same delicate balance of nutrients to sustain his life.

(See Omelet King story on pages 6 and 7.)

Although the egg offers no magic as a therapy, it is and has been a well-balanced package of essential proteins, fats, minerals and vitamins which are the nutrients necessary for human health

An ailment occurring in some Americans today is hypoglycemia Hypoglycemia means below normal blood sugar levels in the human body.

Hypoglycemia may be the result of several disorders A defective funtioning of the cortex of the adrenal gland can cause hypoglycemia which is often the most frequently observed disorder in this greater condition called hypoadrenocorticism

By definition hypoadrenocorticism is either a lack of adequate adrenal cortical hormone production or an imbalance among these hormones The quantity and quality of hormone production in the body depends greatly on a well-balanced diet

Carbohydrates, especially the high (quick) energy ones like sugars found in foods such as pastries, candies, and other sweets, aggravate the hypoglycemic disorder These rapidly absorbed carbohydrates can cause blood sugar levels to sharply rise and fall This fluctuation in blood sugar levels is a characteristic of many hypoadrenocortical patients

To prevent great fluctuations in blood sugar levels and problems associated with it, intake from carbohydrate sources should be reduced and protein consumption should be increased

Short range correction of hypoadrenocorticism includes drug therapy However a primary part of the long-range treatment is nutritional The patient is encouraged to reduce carbohydrate intake and increase fat intake to a moderate level Protein consumption should be increased by eating such foods as eggs, milk, cheese, meat, fish, shell fish, and some vegetables.

Poor Diets – Farm Opportunity

A national survey by the USDA indicates that only half of the 15,000 families studies had diets rated "good."

About one in five families, a very large 21 per cent, had diets rated "poor."

Diets rated "good" had nutrients meeting fully, or exceeding, recommended dietary allowances set by the Food and Nutrition Board of the National Research Council

Diets rated "poor" provided less than two-thirds of the recommended dietary allowance for one or more of seven nutrients studied

What does this mean for the farmer and the large agri business complex which serves him?

It certainly should mean **OPPORTUNITY.**

Only half of the people in the most prosperous country in the world have good diets.

It's a challenge and an opportunity to improve the eating standards of the other half.

Learn the Diet Issue

Every farmer, every farm businessman, every farm organization should become thoroughly familiar with this situation and do some serious thinking about how he or his organization can profit by filling a very real need, the need to improve the diet of the other half.

Before the farmer can profit fully from this situation, he must understand it.

For instance, the study shows that adequate income alone does not guarantee good diets. Among households with incomes of $10,000 a year or over, nine per cent had poor diets.

This means that opportunity does not lie just with the poor and disadvantaged. It exists at all levels of society.

Some more specific findings of the study revealed that as a rule the diets of females were not as good as those of males. Adolescent girls and women, from ages 9 through 54, averaged below the recommended allowances for calcium, iron and thiamine.

Older men and women, especially those aged 75 and above, were low in calcium, riboflavin and vitamin A.

Infants and children under the age of six were below the recommended levels for iron

Think about it Mr. Dairyman, Egg Man, Beef Man, Mr. Farmer Whatever Your Product. Think about it Mr. Allied Industryman and Farm Organization Leader and Member.

Can You Help?

Can your product meet the need of infants for iron?

Can your product put adequate calcium, riboflavin and vitamin A into the diets of the elderly?

Can your product put adequate calcium, iron and thiamine into the diets of adolescent girls and women?

Can your product do it at a price that everyone can afford?

If the answer is yes to any of these questions, poor diets in the U.S mean opportunity for you

Why Not Act?

The only really important question is Why aren't you meeting the need?

Is it because you don't understand the need and the opportunity? Then, get with it, learn.

Is it because those who need don't understand or know about their need? Then, become a teacher, educate them.

Is it because you don't have the product to meet the need? If so, shame on you. Improve your product or get a new one.

To sum it all up, get where the action is.

Hunger-Quality Food

This nation for many years has been gearing up to eliminate hunger and poverty. While the means of doing the job may change from time to time and while the speed and cost involved is often debated, the job will be done.

So why shouldn't the farm community help pioneer, help get the job done better and faster, and profit from it.

In the past several decades farmers have proven repeatedly that they can produce far more than the people of the nation can consume.

With the quantity problem largely solved, farmers can profit by turning to the issue of quality. They can profit by making sure they're part of the movement which provides a quality diet for everyone.

NOW IS THE TIME...

By Max Smith
Lancaster County Agent

To Beware Of Silo Gas

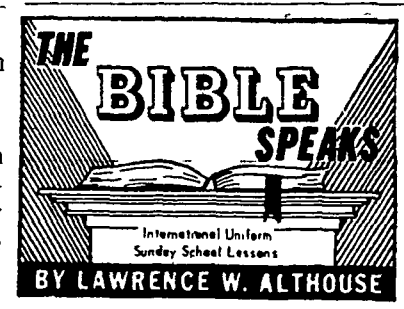
Most of us have heard this word of caution and will surely hear and read of it many times in the next month At silo filling time there may be many kinds of gases develop from the fermentation Most of these are dangerous to man and beast and all members of the farm family should be warned to stay out of the silo chute and away from the silo Growers should not enter a partly filled silo until they are sure it contains no poisonous gases Additional details are available

To Control Weeds In New Alfalfa

New stands of alfalfa seeded early in August will be needing some weed control attention in the next few weeks Producers should spray to control weeds even though few may be noticeable the first month after seeding The use of 2,4 D-B when the weeds are 1 to 2 inches high is the recommendation Those who delay the spraying until the weeds are larger will have poor control and the weed growth will injure the alfalfa stand

To Select Winter Grain Varieties

The seeding of winter grain is about a month away Growers are urged to get their seed supplies on hand of the varieties wanted This gets more difficult with some new varieties on the market We urge growers to get acquainted with the variety, if never grown before, in order to sow and manage it properly. Some wheat varieties often mentioned, such as Blue Boy, are not resistant to the Hessian Fly and must be seeded after the first killing frost (about October 10) The popular variety, Redcoat, may be seeded at any time because it is resistant to Hessian Fly infection Spend some time in selecting the varieties that will do the most good.



THE FAT LIFE

Lesson for August 30, 1970

Background Scripture: Genesis 13 8-13; 18 through 19, 2 Peter 2 6 9. Devotional Reading 1 Corinthians 10 6 13.

It is said that, as a boy, John D. Rockefeller, Sr., was a strong, husky farm lad. When he entered the business world he used his great strength to drive himself unmercifully. At the age of thirty-three he had earned his first million dollars. By age forty-three he was in control of the largest business in the world. Ten years later he had become the world's richest man.

Rev. Althouse

Yet, as he spent his great strength to develop his financial empire, he began to lose his health and happiness. Though his weekly income reached a million dollars, his stomach was so bad that he could eat only crackers and milk. It was discovered that he had contracted **alopecia,** a conditron in which the hair drops off the head accompanied by the loss of eyelashes and eyebrows. One of his biographers said that he had come to look like a "mummy,"—a million-dollar "mummy" to be sure.

More Money, fewer people

Worst of all, however, was the fact that as his wealth grew, his friends became fewer and fewer. He was a man desperate for love, but in his quest for love from some he crushed others who stood in his way. He not only lacked love, he was also deeply hated by many whom he had ruined. Once his image was burned in effigy and he was surrounded by bodyguards day and night. When he was fifty-three, Ida Tarbell wrote of him: "An awful age was in his face. He was the oldest man that I have ever seen."

Rebirth at fifty-three

His health got progressively worse and there were times when he could not even eat crackers and milk. His body was dying for lack of nourishment and some speculated that he would not live past his fifty-fourth birthday.

Then, during one of those long nights when he could not sleep, he lay thinking and came to an amazing discovery; when at last the end came, he would not be able to take with so much as one thin dime! The more he pondered this fact, the more he thought of his own impending death, the more he realized that money is not to be hoarded but used for others.

Thus, he established the Rockefeller Foundation so that vast portions of his fortune could be channeled into worthy causes. Think of the tremendous sums of money that have poured through that foundation upon universities, hospitals, missions, and underprivileged people. His wealth financed the research that made possible the cure for hookworm in the south, the development of penicillin and drugs to combat tuberculosis, diptheria, and other diseases.

Much of the universal disdain for this man turned to respect and admiration. His health improved greatly and at the age of fifty-three he began to practice for the first time one of God's greatest laws: "Give and it will be given to you." He thus took a new lease on life and went on to live to the ripe old age of ninety-eight.

Lure of the fat life

When in his generosity Abraham had given Lot first choice in deciding which area he would live in and claim as his, it seemed that Lot had craftily made the wisest choice. His was to be the rich, thriving land, leaving only the barren hills for Abraham. Yet the fat life near Sodom and Gomorrah proved to be decandent and hollow, and, at last when the corruption brought doom upon these two cities, it was only by the intervention of Abraham that he and his family escaped the consequences of the materialistic life. Even then, Lot's wife looked back wistfully—she found it so hard to tear herself away.

Harry and Bonaro Overstreet have said: "It is one of the basic facts of human life that the ungiven self is the unfulfilled self." There is no fulfillment in the fat life."

On Cutting Out the Middle

Harold E. Neigh, Penn State extension consumer economics specialist, says that marketing costs in 1969 accounted for 59 cents of the consumer food dollar, while the producer got 41 cents.

He continues, "Labor is the biggest part of marketing costs. Earnings and fringe benefits of food marketing employes are expected to continue rising during 1970

"Prices of most inputs, such as materials, equipment, rent, and taxes, that marketing firms will pay are expected to be higher this year than in 1969. Marketing's share of the consumer food dollar probably will average 60 cents," Neigh projects.

What does this mean to the farmer?

For one thing, it means food costs for the consumer will almost certainly continue to rise, whether or not the farmer gets any more income.

Some three-fifths of the average total food costs is accounted for by non-farm costs In other words, more than half of the cost of food is accounted for by non-farm sources and these non-farm costs will rise.

For another thing, this means that farmers should examine very carefully their own products in relation to this non-farm cost.

Can the individual farmer cut out the middle man, either partially or completely?

If so, if the farmer can sell directly to the consumer, or even eliminate some of the middle costs, it is obvious that the farmer stands to reap tremendous rewards.

Many Southeastern Pennsylvania farmers have recognized this fact. It explains the many roadside stands, the farmer produce delivery routes, the farmer owned stores, perhaps even the move toward co-

As national wage rates and other processing costs continually rise, compelling the middle men to take an ever greater share of the food dollar, the rewards for the farmer who can figure out how to go directly to the consumer are going to grow. As the middle man's share grows, so does the profit margin for the farmer who sells direct.

While urban development and tourism are generally, at best, a headache for the average farmer, these modern trends can also benefit the farmer who decides to sell direct. Both urban development and tourism provide the large and available market the farmer needs to side-step the middle men.

In today's dynamic agricultural economy, it's one way of beating the price-cost squeeze.

Lancaster County 4-H Youths Capture District Dairy Honors

Lancaster County 4-H members captured two breed championships and three reserve championships at the third annual South Central District 4-H Dairy Show Thursday at Harrisburg.

The two breed championship winners were:

Robert Witmer, Willow Street RD2, whose two-year-old class champion was named best Brown Swiss, and Thomas W. Aaron, Quarryville RD1, whose two-year-old champion was named best Jersey in the show.

Witmer also showed Jo-Har Thelma Nola to the senior championship, while Aaron's animal was named senior champion of the Jersey breed.

Reserve champion honors went to Aaron's sister, Barbara, who showed Jersey Blossoms Valor Emeral, to top honors in senior yearling class, and junior champion placings.

Russell Wilson, Elizabethtown, led his Ayrshire, Masonic Homes Hianna, to top placings in the two-year-old division, and reserve senior champion, before being named to the breed reserve position.

The third breed reserve post went to Mark Z. Witmer, Willow Street RD1, whose Guernsey took top position in the three-to-four year old class and senior reserve class, before being named breed reserve.

Lancaster Countians took two first places in group competition. A Jersey breed first was captured by a team of Kathy Kreider, Barbara Aaron and Thomas Aaron (two animals), all of Quarryville RD1. A Guernsey Breed first was won by a team of Jesse Balmer, Lititz RD4, and Mark, Peter and Susan Witmer, Willow Street RD1.

Susan Kauffman, Elizabethtown RD1, won first place in senior yearling competition before her Holstein was named junior champion.

Three Lancaster Countians with breed junior reserve champions were: Kathy Kreider, Quarryville RD1, Jersey intermediate calf winner and junior reserve champion; Lois Wanner, Narvon RD2, Brown Swiss junior calf winner and junior reserve champion, and Cheryl Balmer, Lititz RD4, Guernsey junior yearling winner and junior reserve champion.

County youths scoring class firsts in breed divisions were Terry Long, Elizabethtown, Ayrshire intermediate calf, Donna M. Akers, Quarryville RD1, Holstein junior calf, and Sandra Frey, Lancaster, intermediate Holstein calf.

Several placings within the top three positions in classes were won by county youngsters.

Omelet King Leads Local Eggfest

Health food, inflation fighter, versatile and good tasting too

What is it?

An egg

That's the picture of the egg that was painted in Lancaster County Tuesday The egg as the housewife's hero in every sense

The celebration of the egg—second only to milk as the area's largest farm income producer—centered around Rudolph Stanish, who has gained a worldwide reputation as the World's Omelet King

Living up to his reputation, Stanish prepared more than 200 omelets Tuesday while he was here

Most of the king's omelets, made from fresh eggs suplied by R W Sauder Inc Lititz, were enjoyed by leading egg producers and allied industrymen and their friends who attended a meeting Tuesday evening at the new Hilton Inn in downtown Lancaster

Rudolph Stanish, World's Omelet King, greets small crowd at Lancaster Airport before demonstrating his skills with the omelet. Becky Jo Fritz, Pennsylvania Poultry Queen, looks on.

Stanish also gave a demonstration of his skills earlier Tuesday when he first arrived at the Lancaster Airport He also visited the Plain and Fancy Egg Ranch near Manheim Wednesday.

At the Tuesday night program, Samuel Berenson noted the increasing efficiency of the egg industry He noted that today's hen produces 100 more eggs per year and consumes 37 per cent less feed to produce a dozen eggs than her counterpart in 1930

Donald Horn, of D E Horn & Co., Inc., went on to explain that a dozen large eggs weighs one and a half pounds At the current local supermarket price of 60 cents a dozen, eggs cost 40 cents a pound

"Where can the housewife get more for 40 cents a pound?"

He also said that since 1947, the car that cost $1,500 will now cost $4,000, while retail egg prices have dropped from 82 to 60 cents a dozen "The egg is one of the few inflation fighters available to the housewife today," he said.

At prices of 30 to 50 cents a pound, depending on the market price, Horn said, eggs are the cheapest source of protein on the market Most other protein costs at least twice as much, he said

Horn also said many persons use non-protein foods for their energy, but he said high protein diets, which can be centered around eggs, give the best results With the high protein diet, a person can lose weight more easily, relieve fatigue and irritability.

Horn also noted that "the fresher the egg the better the quality." Horn asked Stanish, who was still preparing omelets for confirmation and the omelet king replied, "Amen!"

Horn said many eggs produced in this area are in supermarkets

Omelet King Leads

Rudy at work at the Hilton. Here, he has just rolled the omelet to the edge of the pan. In the background, some of the nearly 200 persons who attended the Tuesday evening affair watch intently as they await their omelets.

(Continued from Page 6)

ready for purchase within a day of production

Herbert Jordan, Penn State poultry specialist, continued by stating that people today are being advised of the need to increase their protein consumption and decrease carbohydrates and snacks

"We're excited about this trend because eggs are one of the best and cheapest sources of protein," he said.

Jordan used the comments as an introduction to his main topic, an explanation of eggs as a means of fighting hypoglycemia which Jordan described as low blood pressure One to five eggs a day are recommended by nutritional authorities to combat this condition, he said **(See separate story for details.)**

Jordan also demonstrated how to distinguish a cooked from an uncooked egg Simply spin them The uncooked egg won't spin readily, while the cooked egg will spin easily.

Pennsylvania's secretary of agriculture, Leland H Bull, said the state inspection program is important to the egg industry because it insures the quality which helps make the consumer interested in buying eggs time after time

Bull also said product research is important to help find new ways to sell agricultural products in new forms

But the real attraction of the evening at the Hilton was Stanish himself

Using three skillets, the omelet king stirred his omelet mix into each one in turn, skillfully stirring the mixture till it was nearly done, quickly sprinkling some cheese, then rolling the omelet to one end of the skillet. This was repeated with the other two skillets, then each was unloaded onto waiting plates

The guests, including many women, admired the ease with which he did it at the rate of one every 20 seconds when he was at peak performance, but he seemed to wear down a little after the first few dozen diners went through the line

Also, it was observed that he seemed to go faster when the Heidelberg Polka Band had a fast number going

Two small fires, which temporarily upstaged the egg, didn't deter him.

Stanish received a plaque from the Pennsylvania Poultry Federation for his work in promoting the egg It was reported that he prepares 20,000 to 30,000 omelets a year, using up to 300 different recipes and 150 different ingredients

Stanish was at the Dutch Days celebration in Hershey later in the week, where he used 150 dozen fresh eggs in making his specialty

Many VIP's, including Pennsylvania Secretary of Agriculture, Leland H. Bull, (lower left) attended the omelet promotion at the Hilton. Admiring the omelet with Secretary Bull are: Miss Nanette Stauffer, Lancaster County Poultry Queen, who will be competing for the state title today (Saturday); Sherman Hill, Pennsylvania House of Representatives, house agricultural committee, and Clarence Manbeck, Pennsylvania Senate, vice chairman of the senate agricultural committee. Lancaster Mayor Thomas J. Monaghan (not shown) presented the key to the city to Stanish.

Pa. Marketing Officials To Be Treated at Freys

The Lancaster County Holstein Association will treat state bureau of marketing officials to a steak barbecue at the J Mowery Frey farm at 2 p m Tuesday.

The marketing officials are taking time out from a meeting in Philadelphia to tour Lancaster County.

The officials will come to Lancaster County at about 10 a m The schedule includes a visit at noon of the Noah W Kreider and Sons farm at Manheim RD3.

Help Us Serve You

Don't assume we know about your farm organization's meeting To get your meeting on our Farm Calendar, it's safer to assume we don't know.

SPERRY RAND

JOIN THE NEW HOLLAND MANUFACTURING TEAM

FULL TIME jobs are available in Manufacturing at our plants in New Holland and Mountville. These jobs are on the night shift in our Assembly Departments. **NO EXPERIENCE** is necessary. We will train you on the job. Successful applicants will be eligible for excellent company-paid benefits including:

- **HOSPITALIZATION**
- **SICK PAY**
- **VACATIONS**
- **HOLIDAYS**
- **RETIREMENT PAY**

If you are interested in joining a team that has built a reputation for building outstanding farm equipment, and has enjoyed a record of steady, rewarding employment, contact J. Harold Wright at 354-1849 or Harold R. Schreiber at 354-1851.

You may apply at our Plant Personnel office in New Holland located on Diller Avenue, Monday through Friday from 8:00 a.m. until 5:00 p.m. or call us for an appointment and we will meet you at our Mountville plant if you prefer. Night interviews available.

Introducing . . . THE B-305
Q: Will the B-305 stand crowding as well as the B-300?
A: It certainly will. Both the B-300 and B-305 have a decided advantage in this characteristic.

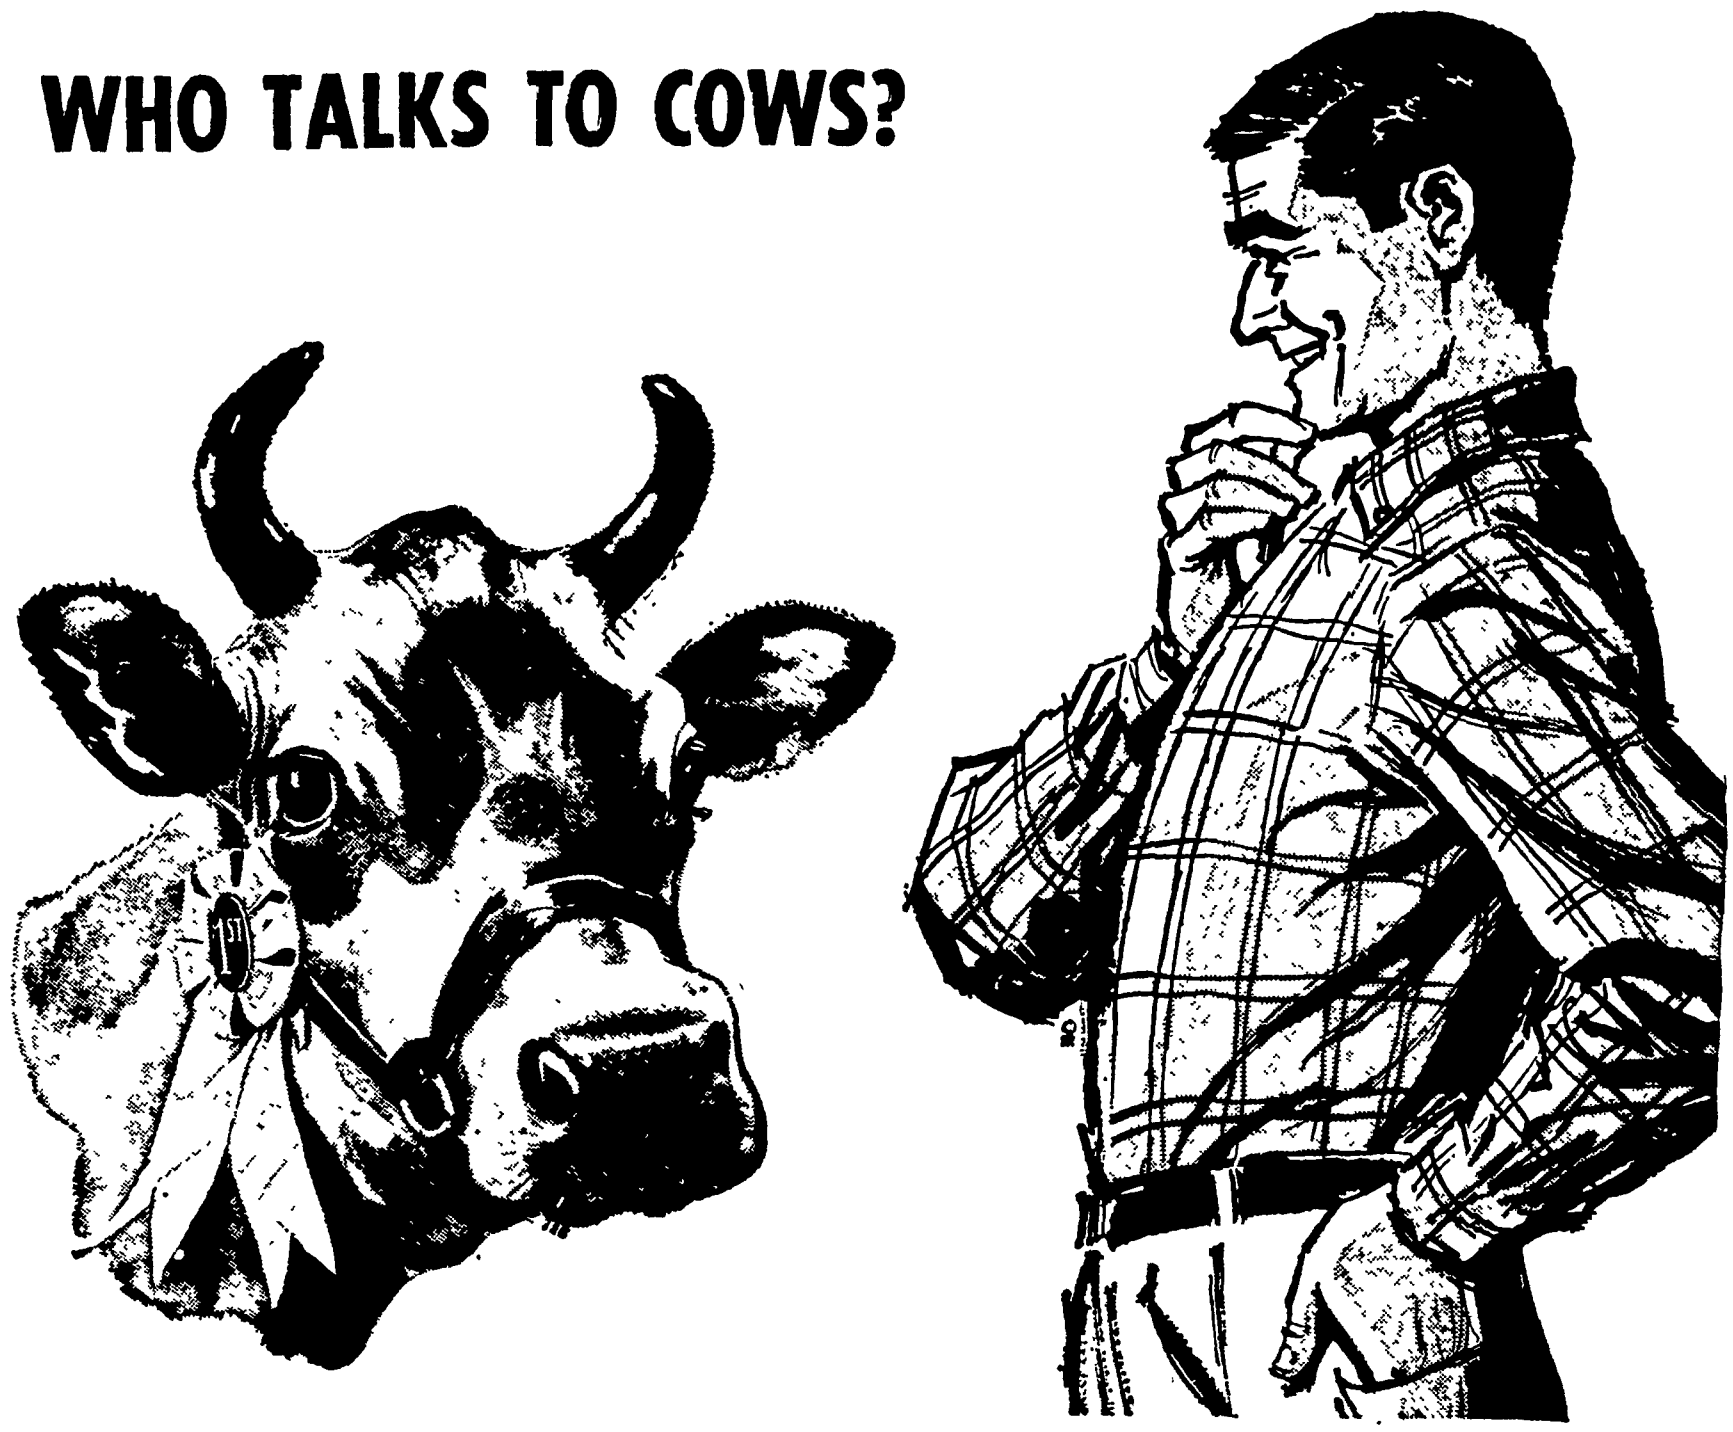
WHO TALKS TO COWS?



We don't! But, we talk to dairy farmers. And not just once in a while, either. We talk to dairy farmers every day. What do we say? "How's milk production?"

What have we learned? That Green Pastures Dairy Feeds are the best value you can buy in a milk producing feed. Of course we aren't satisfied with it, yet, and we keep looking for ways to improve the best. That's why we keep talking to farmers. We'll appreciate talking to you, too!

Interested in trying Green Pastures? Just call 392-2145. Our Dairy Specialist will tell you just how to get the most for every feed dollar you spend. He'll explain why Green Pastures Dairy Feeds mean more milk at less cost. And he'll offer assistance in programming, planning, management.

He'll also ask you . . . ". . . How's milk production?" And he won't charge you a penny!

"FINEST SERVICE ANYWHERE"

Zimmerman Is County Star Farmer for 1970

Jay C Zimmerman of Ephrata RD1, who hopes to become a dairy farmer, is Lancaster County's FFA Star Farmer for 1970

A member and officer of Cloister FFA Chapter, he is the son of Mr. and Mrs James N. Zimmerman and a senior at Ephrata High School.

Zimmerman's farming program this year consists of six Holstein cows, 22 veal calves, three market lambs, six market hogs and several acres of field corn

Zimmerman will receive $175 to cover expenses for a trip to the national FFA convention at Kansas City

Runnerup in the contest was Clair Witwer of Garden Spot FFA Chapter, Lampeter-Strasburg High School Witwer is county FFA president.

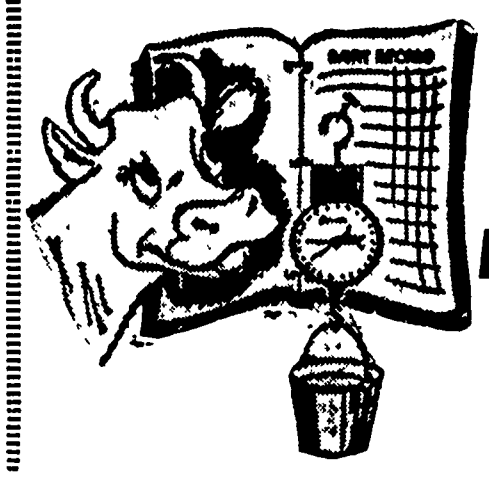
Zimmerman has been very active in FFA events and recently won a gold medal in the dairy judging contest at Penn State. He is also active in 4-H work and the Ephrata Mennonite Church

FFA advisors at Ephrata are Lew Ayers, Charles Ackley and Carl Graybill.

The Star Farmer award is based on a combination of farming program and leadership. Judges for the contest Monday at the Brownstown Vo-Tech School were: Earl Groff, personnel and public relations, Victor F Weaver, Inc, New Holland, Miss Mary Alice Hunter, coordinator for speech and hearing services, Lancaster County Schools, and Stanley Musselman, farm representative, Lancaster County Farmers National Bank

Other contenders for the county award and their FFA Chapter were: Kenneth Grube, Warwick; Jake Musser, Grassland, Scott Kreider, Solanco, James Kreider, Elizabethtown, William Landis, Penn Manor, and Wilmer Groff, Manheim Central

Jay Zimmerman (right), chosen this week as Lancaster County Star Farmer for 1970, poses with Clair Witwer, runner-up.



LANCASTER COUNTY DHIA MONTHLY REPORT

A Registered Holstein cow owned by J Eby Hershey, Gordonville RD1, has completed the highest 305 day lactation in July Rach An produced 18,540 pounds of milk and 915 pounds of butterfat for a 4 9 per cent test

Second high lactation was completed by a Registered Holstein cow owned by Ernest J Sauder, Lancaster RD1 Bobbie produced 20,153 pounds of milk and 880 pounds of butterfat with a 4 4 per cent test in 305 days.

The herd of Paul B Zimmerman, Ephrata RD1, had the highest daily butterfat average The herd of 32 3 Registered Holstein cows averaged 52 3 pounds of milk and 2 11 pounds of butterfat with a 4 0 per cent test.

The herd of V Ferry Rohrer, Columbia RD1, placed second The herd of 34 0 Registered and Grade Holstein cows averaged 58 8 pounds of milk and 1.97 pounds of butterfat with a 3 4 per cent test

Facts Dairymen Should Know

By Max Smith
Lancaster County Agent

What's Your Goal?

Every dairyman should establish a production goal A good goal is to ship 50 pounds of milk per cow per day under today's average milk price in Pennsylvania ($6 08 per cwt) This will result in a $1000 gross income per cow per year Records indicate that expenses will "eat-up" about $850 of this gross, so labor income will be $150 per cow. Therefore, if your goal is to make a $10,000 labor income it will take about 65 cows at this level of production to achieve the goal, if all of your income is from milk sales

Ketosis Prevention

Additional research, as reported in the May Issue of **Agricultural Research**, indicates two important steps that should be taken to prevent ketosis in the fresh cow (1) Don't have the cow too fat when she freshens (2) Feed the fresh cow an adequate diet high in grain and low in roughages

The diet of the fresh cow can either increase or reduce the chances of ketosis If the diet consists entirely of roughage, fermentation in the rumen favors production of acetic acid, which cannot be converted to glucose but can form ketones But if the diet contains a high ratio of grain, rumen fermentation favors production of propionic acid, which can be converted to glucose Glucose production in the cow is the key to preventing ketosis

Fast Milkers

Cows with wide teat canals are easy milkers and can be milked out more quickly The width of the teat canal increases with each lactation Easy milkers that milk out quickly give economic advantages to the dairyman, if he

Lancaster County 4-H Queens Named

The Lancaster County 4-H queens were chosen at the annual Lancaster County 4-H Achievement Day last week They are:

Kim Hess, 12-year-old daughter of Mr. and Mrs J. Robert Hess, Bunker Hill Road, Strasburg RD1, junior queen

Carol Huss, 17-year-old daughter of Mr and Mrs Warren Huss, 379 E Main St , New Holland, senior queen

The two were selected from among 10 finalists More than 40 girls originally entered the competition

The Hess family farms 100 acres and milks 40 head of cows with 25 head of replacement stock.

Kim began her 4-H experiences at the age of nine and has just completed her fourth year.

Her projects include cooking and sewing in the Lampeter-Strasburg Merrimaids Club and a heifer project with the Lancaster County Holstein Club She plans to continue with the heifer project, expanding it to four or five animals by the end of her 4-H years

Looking ahead, she plans to save her money from her heifer projects for college She also wants to go further in the sewing club and anticipates future competition in dress reviews

Also active in school, Kim was attending band camp this week following her crowning as Junior Queen She plays the bells in the Lampeter-Strasburg High School Band and also plays in the 8th Grade bellringers group She is a Junior High Basketball Cheerleader at Lampeter-Strasburg

Carol will be a Senior at Garden Spot High School where she is taking the Academic course prior to becoming either a dental technician or an art major She is cheerleader captain for soccer, as well as a cheerleader for other sports

Active in 4-H for the past seven years, starting at the age of 10, she is a member of the Garden Spot 4-H Club, which is a sewing club This year Carol was in the top 10 in the county dress review, modeling her pantsuit of white bellbottoms, with navy blue knit tunic top She had charge of their local fashion show and was in charge of decorations for that show

Very active in the Garden Spot Club, she is a junior leader She is presently a county council representative, went to Penn State as a delegate in 1969, and to camp near Penn State Carol plans to remain in the 4-H Sewing Club until age makes her ineligible for membership

Contest judges were Robert Malick, WGAL-TV farm editor, Lancaster, and Miss Betty Smoker, Ronks RD1.

Other finalists in the junior division were Karen Stoltzfus, Diane Kreider, Lois Wanner and Pamela Martin

Other finalists in the senior division were Beverly Martin, Ann Roth, Ellyce Jean Engle and Ida Reiff

4-H Club Activities

To Honor Queens

A box social and square dance to honor the 4-H Achievement Day queens will be held at 6:30 p.m. Wednesday at the Farm and Home Center.

A square dance will follow at 8 p.m.

New York 4-H

A group of 25 New York 4-H members will visit Lancaster County Tuesday afternoon and Wednesday morning, reports Miss Joan Lucas, assistant extension home economist.

The group will tour Lancaster County.

4-H Wildlife Club

The Lancaster 4-H Wildlife Club's activity for August was, to some members, the highlight of the year's activities.

Club founders, the Melvin Longs, opened their large Potter County hunting cabin to a group of about 16 persons who ate all their meals by an outside fire. The women prepared good tasting food which included chicken noodle soup, spaghetti, watermelon and brownies.

The group left Lancaster at 8 a.m. Friday and arrived at the Long's at about 4:30 p.m. That evening the group hiked up the dirt road to a beaver dam.

The next day included another hike to a slate quarry where individuals initialed its walls. That afternoon consisted of a 25 mile drive to a lake to swim and sunburn.

Sunday was the long trip home by way of the Pennsylvania Grand Canyon.

The next meeting planned is to help fill out record books and to socialize.

Penn Willow 4-H

On August 14, the Penn Willow 4-H Community Club held its regular monthly meeting in conjunction with a sleep-out at the home of Mr. and Mrs. Robert Martin.

After the business meeting, members played games and had a treat. The following morning the chef's club prepared breakfast for the club members.

The next monthly meeting on September 11 will be a talent show.

Start raising more and better Calves

the Easy NURS-ETTE way

No more carrying pails of warm water or hand mixing milk replacer. Just fill the hopper of the NURS ETTE with milk replacer and the NURS-ETTE will mix milk replacer and warm water and keep it warm until calf nurses the mix (approx. 14 oz.)

Then it will mix a fresh batch of water and replacer.

Eastern says:

MILK-MARKETING DOORS MUST BE KEPT OPEN!

The dairy farmer can afford to see milk-marketing doors close like he can afford an extended plague of garget.

Back in the 'Teens and Twenties, handlers closed their doors deliberately, but with full intent of opening them again after farmers had seen 'the light of reason.'

Today, many of the dairy farmers' market outlets are in danger of being *forced* to close up—with very little hope of taking the lock off, ever again. And when the number of handlers shrinks to a handful, Monopoly moves in: Even the pretense of competition is dead.

Do you want this to happen by default? Or would you rather fight? And don't think it won't take courage.

Now, more than ever, it takes *cooperative courage*—the do-something-about-it kind made possible by interaction in a membership of nearly 10,000 dairy farmers of Eastern Milk Producers.

In Eastern, 'doing something about it' means defending the farmer's market for milk. It means increasing his share in over-all milk profits. It means active promotion of milk and milk products. It means helping the farmer when he's 'locked in' by quarantine or bad weather. And much more.

It's the foundation for *cooperative courage*. To participate in Eastern's fight to keep milk-marketing doors open—and in all other benefits—call your local Eastern representative right now. Or write:

EASTERN MILK PRODUCERS

Sawdust Makes Good Mulch

Contrary to popular belief, sawdust does not make your soil turn acid enough to worry about, says James O. Dutt, extension home gardening specialist at The Pennsylvania State University. No sawdust, except that from walnut wood, has a toxic effect on soil. Sawdust mulch holds water well.

Fulton Grange to Enter Teams In Southern Fair Tug of War

Richard Holloway, Master of Fulton Grange 66, presided at its regular meeting August 24 when plans were made to have a men's and a ladies' team enter the Tug Of War contest at the Southern Lancaster County Community Fair

The committee in charge of the teams is David Wissler, Earl Smoker, Mrs Harold Alexander and Mrs Norman Wood

The Chestnut Level Sewers and Stewers 4-H Club provided the program which featured a fashion show of the clothing the girls made this summer.

Leaders and helpers of this club are Mrs Stanley Stauffer Jr., Mrs Robert McSparran, Mrs Jacob Gicker, Mrs Jesse Cutler Mrs Joseph Sinclair, Caroline Wenger and Junior Leaders Mary Douts and Anna Deaver

The program opened with group singing Miss Martha Burkins entertained with saxophone solos "Home On The Range" and "Blue Tail Fly" Miss Anna Deaver narrated the fashion show

First year girls: Joyce Aument fashioned a tote bag; Martha Burkins, slippers; Joanne McMichael and Patty Deaver, aprons

Second year girls made A-line skirts Bonnie Findley, Debbie Wimer, Julie McMichael and Diane Dunham

Third year girls made sleeveless dresses Diane Kreider and Pam O'Donnell.

Fourth year, dresses with sleeves: Jane McSparran, Donna Findley, Jonell Aument, Donna Wimer, Linda O'Donnell, Sharon Roland and Joanne O'Donnell.

Free lance Mary Douts and Anna Deaver. Jane McSparran played two numbers on her flute

Cooking club leaders are Mrs Nancy O'Donnell, Mrs Barbara Keperling, Mrs. Everett Kreider and Mrs Glenn Deiter. They put on a skit "Maw and Paw." Taking part were Diane Kreider, Julie and Joanne McMichael, Patty Deiter and Jane McSparran

All first and second year 4-H members received pins from the leader, Mrs Stauffer, as did Mrs Robert McSparran for a number of years service to the club

Election of officers will be held at the next meeting, September 14. The Lecturer, Mrs Stanley Stauffer Jr., will be in charge of a black and white and a colored photo contest She is asking members to contact her for details to enter their photos The annual covered dish supper and Booster Night program will be held at 7 p m September 28 and the public is invited to attend

Meal Planning Course

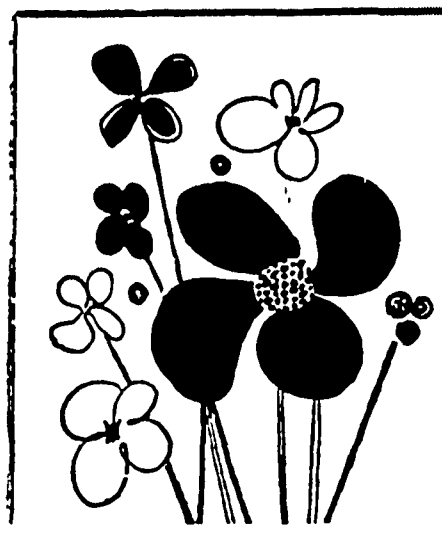
The uninformed consumer spends more money and buys less nutrition than the informed one With the cost of food products, can you afford to remain uninformed about the nutritional value of the different food items you buy?

It's a responsibility to plan meals, shop, and prepare food to feed a family, but there are available aids Pennsylvania State University offers one such aid in the form of a home study course

The course discusses Time waits for no one you can spend money only once, food or pills; lean husbands may live longer; your figure and your future; and don't be fooled by food fads

The aim in each lesson is to help you plan and serve more nutritious meals — making the best use of time and money; to help homemakers, their husbands, and children develop good food habits, and to look to reliable sources for accurate nutrition information

To get the course send $2 65 to Box 5000, University Park, Pennsylvania 16802 Make check or money order payable to Penn State.



FOR THE FARM WIFE AND FAMILY

CHICKEN A LA DELICIOUS
By Mrs. Richard C. Spence

There are as many ways to serve chicken as there are days of the year! Chicken can be served alone with a special flavor accent or it can be combined with most any food to provide a tasty casserole or nourishing one-dish meal. Fruits as well as vegetables go well with chicken. If you are in the mood for something with a tropical accent, serve "Chicken Hawaiian." It combines the flavors of coconut, curry and a special marinade of pineapple orange juice

CHICKEN HAWAIIAN

- 3 pounds frying chicken pieces
- 1 teaspoon salt
- 1 egg, slightly beaten
- ¼ cup frozen pineapple-orange juice concentrate, thawed
- 1 cup corn flake crumbs
- ½ cup shredded coconut
- ½ teaspoon curry powder
- ¼ cup regular margarine or butter, melted

Arrange chicken in shallow pan, sprinkle with salt. Combine egg with juice and pour over chicken pieces, let stand 1 hour in refrigerator, turning chicken once. Mix corn flake crumbs with coconut and curry in shallow dish or pie pan. Dip chicken pieces in crumbs mixture. Place skin side up in a foil-lined shallow baking pan. Drizzle with margarine. Bake in moderate oven (350 degrees) about 1 hour or until chicken is fork tender. Serve on heated plates garnished with pineapple ring which has been dipped in coconut and twisted on endive or parsley. 6-8 servings

SCALLOPED CHICKEN

- 1 stewing hen (4 to 7 pounds)
- ⅔ stick (⅓ cup) butter
- 2 tablespoons chopped onion
- ⅓ cup flour
- 1 teaspoon salt
- 1½ cups chicken broth
- 2 eggs, separated
- 1 cup milk
- 1 cup bread crumbs

SAUCE:

- 1 cup sliced mushrooms
- ¼ cup sliced pimiento olives
- ½ stick (¼ cup) butter

Cook chicken until tender. Remove chicken from broth. Cool and remove from bones. Skim fat from broth. (After preparing this recipe, use what is left of cooked chicken in salads or casseroles, the broth in soup or sauces.)

Melt ⅔ stick butter in sauce pan. Add onion and sauce until tender. Stir in flour and salt to form paste. Add broth gradually. Cook mixture over moderate heat, stirring constantly until thickened and smooth. Beat egg yolks in medium-sized mixing bowl. Add milk and thickened broth to egg yolks. Stir in bread crumbs. Beat egg whites until stiff but not dry. Fold into broth mixture. Place 3 cups cooked chicken in shallow casserole. Pour mixture over chicken. Sprinkle top with pulled bread crumbs, if desired. Sprinkle with paprika. Bake in moderate oven (350 degrees) for 30 minutes. Prepare sauce by sauteing mushrooms and olives in ½ stick melted butter about 10 minutes. Cut casserole into serving portions and top with mushroom olive sauce. 6 servings

CHICKEN AND BROCCOLI

- 6 chicken thighs
- 1 cup water
- 1 teaspoon salt
- 2 pounds fresh broccoli or 2 packages (10 ounces each) frozen broccoli spears
- ¾ cup water
- ½ teaspoon salt
- ¼ to ½ pound process cheddar cheese, finely diced
- ¼ cup whole or skim milk
- 1 tablespoon lemon juice
- 1 teaspoon Worcestershire sauce
- ½ cup shredded wheat, ready-to-eat cereal, crushed
- ⅛ teaspoon oregano

Simmer chicken in salted water until tender, about ¾ to 1 hour. Preheat over to 350 degrees. Cook broccoli in salted water until almost tender, about 6 minutes. Drain. Place broccoli in a 1½ quart casserole. Arrange chicken pieces on top of broccoli. Melt cheese in milk in a pan over boiling water. Add lemon juice and Worcestershire; stir until smooth. Pour over chicken and broccoli. Top with crushed shredded wheat mixed with oregano. Bake 15 minutes or until browned. Makes 6 servings of ¾ cup each.

Calories per serving: About 315 if made with ½ pound cheese, 240 if made with ¼ pound cheese

BRUNSWICK STEW

- 1 chicken (about 3 pounds)
- 1 medium onion
- 3 cups liquid (water or vegetable juices and water)
- 1½ teaspoons salt
- 2 cups cooked or canned tomatoes (1 pound can)
- 2 cups cooked or canned lima beans
- 2 cups cooked or canned whole kernel corn

Salt and pepper to taste

Cut up chicken. Slice onion. Put chicken, onion, liquid and salt into pan. Cover and cook slowly until chicken is tender, about 2 to 2½ hours. Add tomatoes, lima beans, corn, salt and pepper. Heat. Makes 6 servings, about 1¼ cups each.

* * * *

CHICKEN SHORTCAKE

- ¼ cup chicken fat, margarine or butter
- ⅓ cup flour
- 1½ cups chicken broth or chicken bouillon
- 1½ cups milk
- ½ to 1 teaspoon salt, as desired
- ¼ teaspoon pepper
- ½ teaspoon poultry seasoning, if you like
- 2 cups chicken or turkey, cooked, diced
- 2 eggs, hard-cooked
- 6 slices toast, or 12 hot biscuits

Melt fat; blend in flour. Stir in liquids, seasonings, and chicken or turkey. Cook stirring as needed, until thickened. Serve on toast or hot biscuits. Garnish top with egg slices. Makes 6 servings, ⅔ cup each.

* * * *

CHICKEN-KIDNEY BEAN SALAD

- 2 stalks celery
- ½ small onion
- 1 cup cut-up chicken, cooked
- 1½ cups drained kidney beans
- ¼ cup sweet pickle relish
- ¼ cup mayonnaise or salad dressing
- 1 teaspoon prepared mustard

Salt and pepper to taste

Chop celery and onion. Mix all ingredients. Chill before serving. Makes 6 servings, about ½ cup each.

* * * *

BAKED CHICKEN AND POTATO AMERICANO: Place a layer of frozen French fries in a baking pan, then a layer of diced cooked chicken, then sprinkle with grated cheese. Pour white sauce over all. Sprinkle with chopped onion. Bake at 375 degrees for 40 minutes.

IFYE Delegate Sends First Report

By Judy Longenecker

A Special Report

On June 14th, 30 IFYE's met in Washington, D C for orientation at the National 4-H Center Our group was a good cross section of 18 girls and seven fellows, coming from 18 states and going to 10 countries.

Very few of us knew each other, but it didn't take long to change this situation There were four of us from Pennsylvania, and therefore we had met before at Penn State during our state orientation.

Longenecker

One can imagine the mad rush packing, discarding unnecessary articles and weighing our suitcases to be certain we were within the 44 pounds limit for air flight After much excitement and great anticipation, we were up and away to our predetermined destination.

Some were headed to language training centers and then on to host countries such as France We have six girls on the program in France for a two month stay. Five others were going to a training session of eight weeks and then on to host countries for a 12 month stay.

This program is specifically for underdeveloped countries, where they will be working directly with their host country's counterpart of our county agent. They will be setting up rural youth programs, and dealing with agriculture in general. We have three in Brazil and two in Botswana, Africa.

Our stay will be of six months, during which we will live, work and stay as our host family. Of the group there are two in Southern Ireland, two in Italy, one in Iran, four in Germany, two in Japan, two in Korea, three in Thailand, two in Taiwan, and one of us here in the United Kingdom

I might add that there are approximately 100 delegates leaving the United States each year for all parts of the world. The delegates are divided up among three departure dates depending on the area to which one is assigned

The purpose of the IFYE program, in my opinion, can be summed up as international understanding. There is no better way to understand a country's customs than to live as its people live I believe it is quite safe to say that no matter how many differences one has with a different nationality, our problems tend to be very similar. Different environments, climates, speech and customs may prevail, but each of us in his own homeland has similar problems, be they agricultural, political, social, religious or what ever!

I personally am finding the exchange a great challenge and a most rewarding experience at the same time.

Another fabulous opportunity of the exchange is meeting all the other delegates from all parts of the world. To date, I have met five Canadians, three New Zealanders, five Australians, two from Switzerland, two Zambians, one Jamaican, one Finn and one Swede

It seemed almost a coincidence that I had met two of the Canadians last March in Guelph, Ontario, to meet again across the Atlantic Ocean. I must also mention the great number of British that I had the priviledge of meeting who had been on similar trips to the United States or other parts of our globe.

It is really fantastic when one thinks how much the world really is shrinking Sizewise, no, but now the world is at everyone's doorstep If a person hasn't been to a specific area, there almost always is someone who has been Or there is someone who knows a person who is there presently or is going there. It's almost unbelievable

I personally feel most fortunate to receive my assignment here in the United Kingdom I will not only see one country, but England, Scotland, Wales, Ireland, and one of the Channel Islands, either Jersey or Guernsey

I was very lucky to come here as there is no real language barrier, save the local dialect Somehow where language is a barrier, one cannot communicate to any depth

To date, I have spent about three and a half weeks in Worchestershire, England staying with two families I will be returning to England in October time

Presently, I am here in Scotland living with by third Scottish host family, but I will be leaving on the twenty-sixth of August for Ireland I must add, I am having a super time and am most anxious to relate my experiences here in Scotland very shortly

Miss Judy Longenecker, 24-year-old Dumore RD1 resident, in June got a leave of absence from the bank where she works as a teller to travel to the United Kingdom for six months under the International Farm Youth Exchange Program (IFYE).

This report is her first on her experiences since leaving Southeastern Pennsylvania to live with families in foreign countries

A graduate of Solanco High School, she was active in both the agricultural and home economics phases of 4-H.

She is the daughter of Mr. and Mrs Arthur W Longenecker The Longeneckers were host family for a Spanish girl last year.

Silos

Silo maintenance should be getting some attention at this time of the year The interior surface should be protected in order to keep it smooth and tirtight Smooth walls are important for proper settling, to keep out air pockets, and to lengthen the life of the silo Many concrete silos get pitted after several years and may need attention One of the best coatings for concrete, wood, and metal silos is to apply raw linseed oil every 2 or 3 years; this may be sprayed or painted Coatings of concrete plaster or epoxy resins may be applied but are difficult to get to stick to old silo walls The hoops on wooden silos should be kept tight during the summer months

Help Us Serve You

Don't assume we know about your farm organization's meeting To get your meeting on our Farm Calendar, it's safer to assume we don't know.

Remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St, Lititz, Pa 17543. You'll be helping us to serve you better

P S. — If you're not sure you told us already, we don't mind hearing from you again.

FARM WOMEN SOCIETIES

Society 31

The recently organized Society of Farm Women 31 held their August meeting at the home of Mrs Robert Kauffman, Peach Bottom RD2

Mrs Paul Trimble, president, conducted the business session with 14 members and one guest attending She heard reports of the committees formed last month including the outline of programs and meeting places for the next year

Plans to participate in a "tug of war" contest at the Solanco Fair were agreed upon

The president distributed tickets for the Lancaster County Farm Women Convention to be held Nov 7 at the Farm and Home Center She also requested that each member attending take an item for the bazaar table, packaged and marked with a suggested selling price for the benefit of the County Farm Women treasury

The next meeting of Society 31 will be held Sept 21 at 7 30 p m in the home of Mrs Robert Wagner, Quarryville RD1 A white elephant sale will be featured

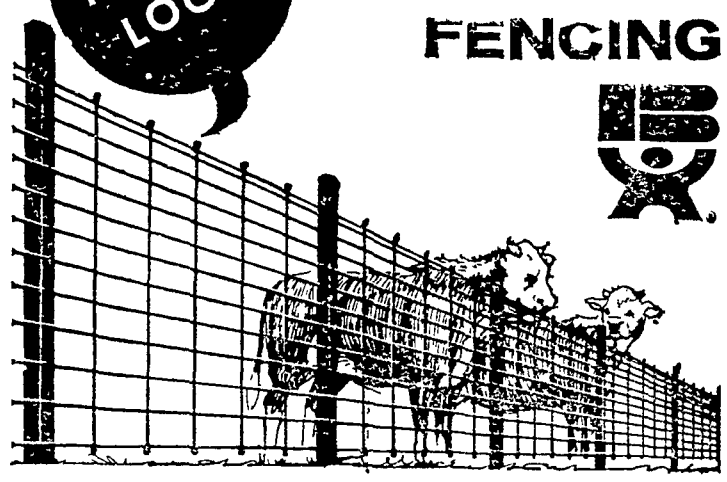
LOOK FOR THE LOOPS

BEHLEN BAR-MESH FENCING



GALVANIZED AFTER WELDING TO LAST A LIFETIME

Behlen steel rod fencing gives you years more of heavy duty service because it's dip-galvanized after welding. Weld spots are completely covered. No place for rust to start. And the thick zinc coating is up to six times heavier than the surface of ordinary galvannealed wire. Closer six inch spacing of vertical rods provides extra strength. Panels mount easily with inexpensive lag screws or "J" bolts through top and bottom loops... so "Look for the Loops".

Lancaster County 4-H Queens

Ed Wichenheiser, master of ceremonies at the Lancaster County 4-H queen contest, presents a trophy to Miss Carol Huss, new senior 4-H queen. Miss Marilyn Krantz, past senior queen, looks on in the background.

(Continued from Page 13)

queen contest was Ed Wichenheiser of WCOY Radio, Columbia.

Jesse Balmer, Lancaster County 4-H Council president, was master of ceremonies for the overall Achievement Day activities. Stanely Musselman, executive vice president of the Lancaster County Farmers National Bank, presented 4-H awards.

Talent contest winners were First place, Amy Glatfelter, 2025 State St., East Petersburg, Boots N' Saddles Club, second place, Bryan Wagner, Quarryville RD3, Red Rose 4-H Baby Beef Club, third place, a team from the Mount Joy Sewing Club consisting of Beck Boyd, Mount Joy RD2, Julie Garber, Mount Joy RD2, and Wendy Hostetter, Manheim RD2.

Talent show judges were Mrs Verna Lefever, 13 Highland Drive, Lancaster, and Mrs Wayne Eberly, 425 E Bainbridge St., Elizabethtown

Some 88 county 4-H members participated in the displays and champions were declared in eight major categories The champions and reserve champions by categories are as follows:

Foods — Debbie Lewis, Elizabethtown, champion, from the breads division

Under foods, there were six reserve champions by division as follows cookies, Eric Eshleman, Pequea RD1, cakes, Debbie Degenhardt, Lancaster RD6, snacks, Karen Harnish, Lancaster RD6, breads, Maureen Doyle, Elizabethtown RD1, salads, Nancy Lefever, Oxford RD1, and dairy foods, Debbie Lewis, Elizabethtown RD1

Rabbits — Mike Campbell, Pequea RD1, champion; and David Wenrich, Manheim RD1, reserve champion

Photography — Mary Jane Eshleman, Elizabethtown RD1, champion, and Suzanne Martin, New Holland RD2, reserve

Handyman — Jeffrey Risser, Leola RD1, champion, and Wes Berger, Bainbridge RD1, reserve.

Geology — Jeffrey Risser, champion, and Janet Landis, 782 Hartman Station Road, Lancaster, reserve.

Entomology — Doug Martin, Pequea RD1, champion; and Eric Eshleman, Pequea RD1, reserve

Flowers — Nancy L Sauder, Mount Joy RD2, champion, and Debbie Patschorke, Lititz RD2, reserve

Vegetables — Dennis Steinmetz, Lititz RD1, champion, and Wayne Erb, Mount Joy, reserve

Both champion and reserve champions received rosette ribbons for their placings.

Rabid Animals

Last year 19 rabid animals were submitted to the State Animal Disease Diagnostic Laboratory, of this number 12 were bats, 4 skunks, and 3 were dogs All of the rabid bats come from the southeastern part of our state, they are probably the most important reservoir of the disease We get numerous calls about eradicating bats from attics and un-used buildings All persons are cautioned about handling bats, they are difficult for the average person to eliminate, we suggest that qualified exterminators be secured If attacked and bitten by a bat, see your doctor immediately also, kill the bat and take it to Laboratory at Summerville, Pennsylvania Rabies is a serious disease and careful prevention is very much in order.

Corn Crop

The country's corn crop is getting full news coverage this past week and appears to be in trouble. To the best of our knowledge this blight condition has not been diagnosed in Pennsylvania to date, however, the reduction of yields in other parts of the country will change prices Due to this condition, I'd like to suggest that other farm grains be considered in the ration to replace some of the corn Both barley and wheat have a place on most livestock and dairy farms Barley can replace half of the corn in beef cattle and hog rations while wheat may be used up to 25% of the ration with cattle and twice as much for hogs. Both of these grains are on many farms and may be used in the rations with success.

Grube's Hogs Again—Add 4-H Title

Mike Grube of Elm poses with his grand championship Hampshire hog at the Lancaster Stockyards Tuesday.

Mike Grube of Elm did it again.

His 220 pound Hampshire hog won the grand championship at the Lancaster County 4-H Pig Roundup and Sale at the Lancaster Stockyards Tuesday.

The animal was bought by E. W. Martin Co., local packer, for one of the top prices for a 4-H hog in recent years. Martin Co. paid $1.14 a pound or a total of $250.80.

Early this month, Grube's hogs won both the grand championship and reserve grand champion ship at the Eighth Annual Lancaster County FFA Market Hog Show and Sale.

The 14-year-old Grube is the son of Mr. and Mrs. Jay Harold Grube, Elm. He is a sophomore at Warwick High School.

Grube purchased the 4-H pig from Dutch Valley Farms, where his earlier winners were acquired. The price paid for this year's champion topped last year's by 48 cents per pound.

Grube also had the top Yorkshire in the show, a 205 pound animal which was sold for 26 cents per pound to Penn Packing. The animal brought $53.30.

The reserve champion honors went to Donald Bollinger, son of Mr. and Mrs. Paul Bollinger, Denver RD2. He is a veteran showman and has been a top competitor since he was 11 years old when he won the 4-H contest.

Bollinger's 205 pound Duroc sold to E. W. Martin for 53 cents per pound to bring the youth $108.65. The youth also had the Berkshire champion which sold for $58.18.

While Mike was trying to get that grand championship pose, the Hampshire had other ideas. After a hot morning in the show ring, he figured he'd earned a nap in the water trough. Between some splashes in the trough, we finally did get the pose of champions, shown elsewhere.

Other winners in the contest were Kerry Boyd, Ephrata RD1, pen-of-ten, Andy Augsberger, Reinholds RD1, Spotted Poland, Audrey Augsberger, Reinholds RD1, Poland China; Dan Baum, Elizabethtown RD3, Landrace and junior fitting and showman; Michael Hastings, Kirkwood RD1, Chester White, Timothy Swarr, Manheim RD2, crossbred.

Marlin Bollinger, of Denver RD2, was named senior fitter and showman.

Total cash paid for the show's 138 animals was $6,862-28, for a 24.14 cents per pound average, including the champion. The animals weighed a total of 28,425 pounds, for a 206 pound average per animal. Pigs around the average weight brought the best prices, while those 180 pounds and under sold for as little as 18.5 cents per pound.

Auctioneer was Clyde Wolgemuth, a familiar figure at the youth sales.

Buyers supporting the 4-H'ers included E. W. Martin, Kunzler, A and B, Penn Packing, Armour and J. P. Warfel.

WHETHER you store in a sealed unit, conventional, or trench silo, the Allis-Chalmers Forage Harvester has the BIG capacity and the attachments to chop any crop the way you want it . . . as fast as you can store it. And its cutting accuracy is unsurpassed. It makes uniform silage from as short as 7/32 of an inch up to as long as 2-1/4 inches.

Top-quality silage means top livestock gains . . . and your silage gets to the silo in top condition every time with the Allis-Chalmers Forage Harvester. That's why Going Orange is Going Great!

Pa. Tart Cherry Crop Hit By Weather, Rot, Birds

Pennsylvania tart cherry growers, who earlier in the season expected a bumper crop, have had a serious setback.

Production is now estimated at 9,000 tons, a drop of 4,000 tons from the July 1 forecast, and 18 per cent below last year, according to a survey by the State Crop Reporting Service

Heavy rains and below normal temperatures caused splitting and brown rot in the important southcentral district where growers also complained of consiredable bird damage. Erie County producers were more fortunate and their large crop accounted for a significant portion of the state's production.

Quality of the fruit was generally fair to poor.

Picking of early peach varieties began later than usual because cool, wet weather delayed maturity. Quality and size of early varieties were good.

Total state production is expected to be 84 million pounds, less than previously anticipated, and 30 per cent below last year.

Apple production in the Commonwealth this year will lag five per cent behind last year's bumper crop. Growers expect to harvest 500 million pounds. Damage from weather and disease is reported at a minimum.

Erie County grape growers are looking forward to a 39,000 ton crop, an average year, but up 56 per cent from last year's disappointing crop. Grapes are large and well advanced

Pear production is estimated at 3,200 tons, unchanged from last year.

Large Potato Contest

Competition will again be held this year to find the "world's largest potato," it was announced by the Potato Chip Institute International, sponsor of the annual event

The competition is open to consumers, growers and processors and there is no limit to how many entries may be submitted, according to Harvey F Noss, Jr., PCII official

The entries will be weighed and displayed at PCII's 34th Annual Conference in Miami Beach in late January, Noss explained. The largest spud will earn its sender a $100 U.S Savings Bond.

Entries should be mailed no earlier than December 1, 1970 and no later than January 7, 1971, Noss said. They should be sent to The Potato Chip Institute International, 940 Hanna Building, Cleveland, Ohio 44115.

● Facts

(Continued from Page 13)

will recognize this fact and remove the milking machine in time to prevent teat damage resulting in mastitis.

Hard milkers are less susceptible to mastitis. But no dairyman can afford to keep slow milkers in the barn just to prevent mastitis.

It's more profitable to keep fast milkers and remove the milking machines as soon as they are milked To prevent udder infection, dipping teats with a disinfectant solution may be of value on fast milkers

Calf Raising Study

South Dakota has published the results of a study on rearing calves indoors versus outdoors at weaning ages of 3, 5 and 7 weeks Temperatures indoors were controlled to a minimum of 50°F Outdoor temperatures varied from a low of about -10°F. to a high of 95°F Calves were housed in individual pens in an insulated barn or in individual outdoor hutches during the first 14 weeks and all the calves were outside from 14 weeks to 26 weeks of age

Conclusions (1) Average daily gains were not significantly different among weaning ages or between housing systems (2) Calves weaned at 3 weeks ate significantly more starter. (3) Hay consumption was not affected (4) Housing system has no effect on scours or pneumonia. (5) Less bedding and less labor were used in outdoor hutches. (6) Calves weaned at 3 weeks of age can be reared in an outdoor housing system and have growth rates comparable to later weaned calves housed indoors in heated barns

Replacements

According to recent studies dairymen need to raise 75 per cent of their heifer calf crop for replacements Even this percentage does not allow for culling of heifers before they freshen

The price of purchasing herd replacements has increased and, with the reduction in the total number of cows in the U S. (from 23 million down to 15 million) the sources of replacements become fewer

A well-bred heifer ready to freshen is worth money either as a herd replacement or to sell

Central Testing Laboratory

By action of the State Board, local DHIA associations that are not sending milk samples to the Central laboratory for testing by April 1, 1971, will be assessed at the monthly rate of four cents per cow on test to help defray the amortization costs of building and equipment After July 1, 1971, the monthly assessment will be eight cents per cow on test

Purina Dairy Conditioner Special can prepare cows for good production at low cost

If you're not among the many good local dairymen who have started mixing Purina Dairy Conditioner Special with your own grain to build a research-proved dry cow ration, it can pay you to check into this low-cost way of feeding dry cows.

Purina Dairy Conditioner is a 16 percent protein ration, fortified with extra Vitamins A and D plus phosphorus to help guard against milk fever.

To help you save on dry cow feeding, Purina Research recommends varying feeding levels, depending on cow condition and the quality of your roughages For example, if a cow is in good condition and your roughages are of excellent quality, you would feed less Purina dry cow ration than if the cow were in only fair condition and if the roughages were of only fair quality.

Using Purina Check-R-Mix* formulas we can build you a low-cost dry cow ration, combining Purina Dairy Conditioner with your grain. Or, if you're feeding low-protein roughages, it may pay you to feed Dairy Conditioner "straight" — just as it comes from the bag.

More and more successful area dairymen are proving that good dry cow feeding pays off in extra cow condition — and extra milk production in the next lactation For example, 100 to 200 pounds of additional body weight at freshening can pay off in 1,000 to 2,000 pounds of extra milk during the lactation.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to point out how Purina Dairy Conditioner Special can help prepare your dry cows for good production at low cost.

Strength, Performance, Dependability. You've got 'em all with VAN DALE'S NEW TRAVELING BUNK FEEDER.

Van Dale's SCF-1400 is the traveling feeder to put you on the track to faster, more profitable operations. Automatically, it delivers up to 40 tons of silage per hour to bunks on a single chain, continuous "shuttle" service.

Feeder trough chain is No. 67 pintle (12,500 lb. strength) and drive chain is C-550 steel (average top strength of 10,000 lbs.). Interlocking, snap-together galvanized metal components reduce erection time as much as 50%. Suspended or floor-mounted, rails are mounted with Van Dale's exclusive clip-on brackets to provide extra-rigid support. Unit adapts to any feeding need in-barn or out-of-doors.

Lancaster County Grange Holds Picnic, Adopts Three Resolutions

Lancaster County Pomona Grange 71 held its picnic at 7 p m Saturday, August 22 at Holtwood Park with an attendance of 50 persons

Plans were made to observe the fiftieth anniversary of the Lancaster County Pomona Grange at 7:30 p.m. October 10 at Fulton Grange Hall, Oakryn. National Grange Master, John W Scott, will be the speaker.

Also attending will be Mrs. Scott, A Wayne Readinger, Master of the Pennsylvania State Grange, and Mrs Readinger who is Ceres of the National Grange

The special program will be in charge of the Pomona Lecturer, Mrs Jesse Wood. Also assisting on the program committee are the Pomona officers, Mrs Melvin C. Boyce, Mrs Joseph Hess, Mrs Ira Welk, Mrs. Richard Hanks and Ralph Wanner The Pomona Women's Activities committee, Mrs Charles Reath, Mrs Richard Maule and Miss Helen Wanner will serve as the hospitality committee

Pomona Master, Gyles H. Brown, conducted a short business session when the following resolutions were adopted

(1) "WHEREAS, There is pending in the State Senate (which has already passed the House of Representatives) a bill to raise revenue by legalizing lotteries

WHEREAS The states where they are now legalized do not produce the amount of money which was anticipated

WHEREAS, Lotteries are morally wrong and take money from those least able to spend it. Therefore be it

RESOLVED, That Lancaster County Pomona 71 go on record as opposed to the passage of a lottery bill at this session of the Legislature—or at any session in the future"

(2) "WHEHEAS, There is now a plan to move the Soldiers and Sailors Monument from Penn Square in Lancaster City to Musser Park

WHEREAS, Besides being a memorial to the soldiers and sailors who died in the Civil War it also stands on a very historical spot The first Court House in Lancaster County was built there in which was held the Continental Congress for a day and it was also the Capital of Pennsylvania for 13 years The land on which the monument stands does not belong to the city

WHEREAS, The reason given for its removal is for safety reasons and to speed up traffic through the square We think traffic travels too fast now and with the by-pass to the north and the one to be built soon to the south that will relieve traffic to a large degree Therefore be it

RESOLVED, That Lancaster County Pomona Grange 71 wishes to go on record as opposed to the moving of the monument from its present location"

(3) "WHEREAS, There is an effort being made by certain groups and individuals to change the laws pertaining to the sale of pornographic material making it legal to sell or possess such material to sell to adults And

WHEREAS, Such legislation would only lower our moral standards without benefiting anyone Be it

RESOLVED, That Lancaster County Pomona Grange, meeting in regular session, goes on record as opposing any legislation that would destroy or weaken our present laws dealing with such material"

Serving on the resolution committee were Norman Wood, Richard Maule and Ralph Wanner

Mr and Mrs Clifford W Holloway Jr were selected as alternate delegates to attend the Pennsylvania State Grange convention Oct 26, 27, 28 and 29 at Meadville, Pa in the event Pomona Master Brown and his wife cannot attend

Mrs Jesse Wood gave a report of the Pennsylvania State Grange Leadership School held at Gettysburg June 23, 24 and 25

A donation was given to the National Grange Youth Leadership Fund

Mrs Jesse Wood, Misses Joyce, Peggy and Sandy Galbreath were in charge of games and Charles McSparran conducted a quoit tournament

The next regular Pomona meeting will be held at 8 p.m. Oct 17 at Fulton Grange Hall, Oakryn.
